JACOB DAVIS

Online Ordering Support Specialist & Systems IT Professional

Omaha, NE (Remote / Hybrid) | jacobdavis.tech | jacobdavissupport@gmail.com | linkedin.com/in/jacobdavistech | github.com/ripksp

PROFESSIONAL SUMMARY

Online Ordering Support Specialist with 8+ years of progressive experience across SaaS, POS, fintech, and broadband infrastructure platforms. Currently at DoorDash supporting SMB restaurant partners—querying Snowflake via Mode Analytics to inspect raw menu ingestion JSON payloads and map multi-unit merchant locations, coordinating with product engineering squads via Slack and Intercom side-conversations, championing Scribe technical SOP runbooks, co-leading Culture Committee sessions ahead of MSO training meetings, and managing end-to-end DNS/SSL lifecycles and white-label iOS/Android storefronts. Proven track record across Tier II POS network escalations (Toast), payment gateway API debugging (365 Retail Markets), fraud/risk triage (PayPal), and DOCSIS routing (Cox).

CORE TECHNICAL COMPETENCIES

Data, APIs & Menu Ingestion:	Snowflake (Mode Analytics SQL), Raw Menu JSON Payload Inspection, Postman REST API Debugging, Webhook Schema Validation, Multi-Unit Merchant Mapping, Python & HTML/CSS
Web, DNS & Storefront Ops:	DNS Provisioning (A, CNAME, TXT, MX), SSL/TLS Certificate Lifecycles, White-Label iOS & Android Storefronts, Bluehost / cPanel & GitHub, Scribe Technical SOP Runbooks, Knowledge Base Curation
Networks, POS & Hardware:	TCP/IP, DHCP, Subnets & VLANs, DOCSIS Provisioning & SNR Diagnostics, Android POS Terminals & Kiosks, Epson Thermal Kitchen Printers, Remote CLI OS Recovery, EMV Card Readers & Gateways
Collaboration, ITSM & AI:	Slack & Intercom Side-Conversations, Product Engineering Squad Escalations, Salesforce & Zendesk, Prompt Engineering & HITL Workflows, Windows, macOS, Android, iOS & Linux, Risk / Fraud Triage & Disputes

PROFESSIONAL EXPERIENCE

Online Ordering Support Specialist — DoorDash · Remote *Jan 2026 – Present*

- Query Snowflake via Mode Analytics to inspect raw menu ingestion JSON payloads and map multi-unit merchant storefront locations accurately.
- Coordinate directly with product engineering squads via Slack threads and Intercom side-conversations to isolate bugs, verify edge cases, and expedite platform fixes.
- Championed Scribe and authored step-by-step technical SOP runbooks for menu workflows, payload inspection, and support onboarding.
- Manage end-to-end domain lifecycles (DNS provisioning: A, CNAME, TXT, MX, and SSL/TLS certificates), troubleshoot white-label iOS/Android storefronts, and co-lead Culture Committee sessions ahead of department-wide MSO training meetings.

Technical Support Specialist — 365 Retail Markets · Remote *2024 – 2025*

- Performed Postman API payment gateway debugging to validate transaction payloads, inspect response codes, and isolate webhook timeout failures.
- Executed remote CLI kiosk OS recovery and hardware diagnostics across unattended POS terminals, card readers, and local network interfaces.
- Resolved complex enterprise escalations spanning payment processing, refund workflows, and cloud reporting discrepancies.

Tier II Technical Support Engineer / POS Specialist — Toast, Inc. · Omaha, NE *2021 – 2024*

- Handled escalated Tier II technical incidents for enterprise and multi-unit restaurant groups experiencing live service disruptions.
- Diagnosed complex networking and hardware issues across Android POS terminals, Epson thermal kitchen printers, DHCP scopes, subnetting, and VLAN segmentation.
- Coached frontline specialists on network isolation workflows and partnered with engineering teams on reproducible bug escalations.
- Awarded the peer-nominated 'Lead with Humility Toasty' Award (2022) for cross-team mentorship and calm execution during high-severity outages.

Customer Operations Specialist — PayPal · Omaha, NE *2019 – 2021*

- Managed escalated payment disputes, chargeback investigations, and fraud/risk triage while maintaining strict adherence to banking and PII security standards.
- Earned two Spot Awards for Collaboration and Inclusion while consistently ranking among top performers in customer satisfaction KPIs.

Technical Support Specialist — Cox Communications · Omaha, NE *2017 – 2019*

- Executed DOCSIS modem provisioning, signal-to-noise ratio (SNR) diagnostics, and residential/commercial gateway routing troubleshooting.
- Identified regional node degradation patterns and supported frontline teammates on internal network diagnostic utilities.

COMMUNITY LEADERSHIP & RECOGNITION

- **Do Space Volunteer Technology Mentor** — *Do Space · Omaha, NE, 2018 – 2024 (6 Years)*: Volunteered for six years hosting Tech Help Tuesdays—mentoring Omaha citizens of all skill levels on hardware diagnostics, networking, software troubleshooting, and coding basics.
- **Top Performer in Customer Satisfaction KPIs (VOC, NPS & CSAT)** — *Career-Wide Distinction, 2017 – Present*: Consistently ranked among top performers in Voice of the Customer (VOC), Net Promoter Score (NPS), and CSAT across support organizations.
- **"Lead with Humility Toasty" Award** — *Toast, Inc., 2022*: Peer-nominated recognition honoring Tier II mentorship, collaborative escalation ownership, and calm execution during high-volume restaurant outages.
- **Spot Awards for Collaboration & Inclusion** — *PayPal, 2019 & 2020*: Awarded twice for cross-team knowledge sharing, teammate coaching, and elevating dispute and fraud triage accuracy.
